BRIEF MENTION.

A VINDICATION .- A reply to the letter of " Ali quis " in our last on the career of Tom Paine, is unavoidably deferred until next week.

inter-island steamer-the name has not transpiredwill be launched from the shipyard at the end of the Esplanade at 6 o'clock on Tuesday morning next, the 5th instant.

CHINESE JEALOUSY .- It is reported that a Chinese merchant from Honolulu came near getting into trouble with Chinese officials on matters connected with emigration, and that one now in China on the same business is being "looked for" by irate myrmidons of the Celestial Emperor.

Music.-The band will play this afternoon at Emma Square, at 4½ p. m. The following is the programme :

CAUSE OF DECREASE .- A Hawaiian, in discussing

the cause of the decrease of the people, declared it to be mainly owing, in his opinion, to the general neglect of the Divine command, " Honor thy father and thy mother, that thy days may be long in the land," &c. He adduced the history and present condition of the Chinese, who, he said. though heathens, were noted for the care they bestowed upon their parents; and how very numerous they were!

TELEPHONIC .- The telephone is rapidly coming into use among business men abroad, as a valuable adjunct to the management of their affairs, for by its aid they can communicate with such of their establishments as may be at a distance without leaving their offices. How convenient this little machine would be to any of our merchants residing in Nauanu Valley or at Waikiki, who might not wish to come into town, and who would be able by its use to direct their business without personal attendance. Who will take the lead by importing an instrument, and thus secure the honor of its introduction? Don't let Mani get ahead

NAVAL NEWS.—Pay Director Edw. C. Doran, U. over 1876. by the Navy Department to hold himself in readiness to proceed to Paris as a special commissioner to represent the U. S. Navy, at the Exposition. Pay Inspector Caspar Schenck will probably soon relieve Pay Master Cochran of the Pensacola. The Tuscarora has been detailed to take the Samoan Commissioners back to Samoa. She will probably touch here en route and it is said the Pensacola will return to California soon. Engineer Emanuel, late of the Tuscarora, was recently married in Philadelphia, to a very wealthy and handsome young lady.

DIOSPYROS KAKI .- The attention of the horticulturists on the Coast is now being attracted to this new and valuable fruit, which is destined to become generally popular from its excellence and the ornamental beauty of the tree on which it grows. It is better known as the Japanese persimmon, but differs materially from the persimmon of the Southern States, as it ripens without frost, and is equally palatable whether fresh or dried. The tree is a prolific bearer and as hardy as the pear. The fruit is pronounced equal to the peach or pear, and is sufficiently solid to be packed and shipped with safety. It grows to a large size, sometimes attaining a pound each in weight. It is cultivated precisely as the apple, the grafted trees bearing in about four years. Seedlings require much longer time, and are not reliable. Col. Hollister, of Santa Barbara, Cal., writes Table No. 11, shows the different national vesof the dyospyros kaki as follows: "It is the most beautiful of all the fruits I have ever seen, and the most delicious to the taste. It is of a rich yellow sengers have arrived at and departed from this color, and seems more like a ball of wax than a port during the year, with an excess of 1,218 arfruit. It is simply splendid." We think an effort rivals over departures, and a decrease of 906 for its introduction is worth making; the cost cannot be very great. Whoever brings it here and succeeds | called at this port on their way to and from in its propagation will be esteemed by the community New Zealand and Australia, showing 1.077 less Geo. F. WELLS & CO., Fort St. | as a public benefactor.

CROWDED OUT .- The space occupied by the annual statistics in to-day's paper, compels us to defer until next week much interesting matter prepared for this issue.

CAUGHT .- Young Dryer, who recently absconded from the Hawaiian Hotel with money and watches, was, through the exertions of Mr. Severance, Hawaiian Consul at San Francisco, captured on the arrival of the W. H. Meyer at that port on the 30th of Jan. The information was received there by the Australia on the 29th. Dryer gave up all he had-\$275 in coin and the two watches which he had taken, and was permitted to go, as his accusers and the witnesses were at the Islands. He is reported to have been an old hand at thieving, this being his third

RAMIE .- It is said that Don Manuel Ortega Garcia (of Mexico) is obtaining splendid results in his workshops in the manufacture of textures of the so-called vegetable silk, extracted from the ramie plant. What has become of the efforts made here some years ago to introduce the cultivation of this plant? We hope sufficient interest may be felt by some of our enterprising business men to induce them to make inquiries as to Mr. Garcia's method of manipulation which has led to his reported success. A little knowledge on this point is all that we require for turning the cultivation of the ramie plant into a source of great public benefit. The great trouble heretofore has been in the cost of preparing the raw plant for manufacturing purposes. We still think Coleman's machine is the one best adapted to overcome this difficulty.

Horses for Our Steam Fire Engines.

To the Editor of the Pacific Commercial Advertiser: SIR-As there is every probability of Honolulu possessing a steam fire engine, it is quite likely that it may be found too heavy to drag about by manual power; it would be well, I think for our legislators to make a law similar to that now in existence in St. Petersburg, which is "That when a horse runs away, the carriage is confiscated, the horses are taken for the use of the fire brigade, and the driver or owner is fined by the authorities." As the Chinese will be the first to introduce " steamers " on this Island, I trust our Insurance Agents will not be behind-hand in furnishing another, for they are the only ones who are directly interested in the protection of property from fire, and therefore should procure proper appliances. Although the sonable to expect them to import " steamers " while Insurance Companies reap the sole benefit.

Honolulu, March 1st, 1878.

SAN FRANCISCO, Feb. 18th, 1878. At Victoria, B. C., the Hawaiian bark Lunalilo, before reported ashore, was condemned and sold at public auction, Feb. 8th by Davies & Co., for \$900, Lieut. Wyse, Chief of the Darien Canal Expeditions arrived at Panama, Jan. 18th, from the head water of the Tuyra and reports the expedition in good health and that satisfactory progress is being made. The ship France Cherie sailed from here the 10th inst., for Flint Island to load guane for Hamburg. and will touch at Honolulu. John E. Owens, the actor, now in the east, goes

A case of leprosy in a Chinaman has been met here in the Branch Jail by Dr. Blach, the city physician, who intends shortly to lecture on the subject before the S. F. Medical Society. He has been furnished with particulars of the disease and mode of treatment by Leo Chau Foey, a leading Chinese physician, and will produce the leper for illus-

H. M. S. Shah, Admiral De Horsey, arrived at Tahiti, December 15, 1877, 31 days from Esquimalt, and was to leave on the 22d for Concepcion, Chile. H. M. S. Albatross was also at Tahiti. The ironclad Triumph, the future flag-ship in the Pacific, will be furnished with the Siemens electric light and also with six 20 pound Armstrong guns for saluting and defence against torpedo boats. The British men-of-war Albatross, Amethyst and Fantome of the Pacific Station have been ordered home to be

paid off and go out of commission. At Washington, Jan. 31, the House Appropriation Committee made several changes in the diplomatic service. Among others the salary of the mission to Hawaii is to be fixed at \$5000. The Republicans will oppose these reductions. Two schooners are now being built at Cousin's yard for Tahiti, each to cost \$4000, -on delivery at Tahiti, which the contract calls for in 150 days. Rumors are affoat about great earthquakes and tidal waves in South America. Guayaquil is said to be destroyed, and Callao badly

damaged. There is now an Act before the California State Legislature to make the training ship Jamestown, a state institution by appropriating \$25,000 a year for its support in addition to the same amount given by the city of San Francisco and making the total number of boys on board 200, besides the 50 or 80 appointed by the city. The Hongkong Government has refused to grant

a license to the ship Charter Oak to carry several hundred Chinese emigrants to Honolulu, although the vessel had been specially fitted up for the trade and most passengers were on board. It also refused a similar license to the Perusia, the pioneer steamship of the new China and Peru line, and she consequently left Hongkong, January 13th, for Honolulu and Callao with cargo only. Although in both cases all the requirements under the ordinance had been complied with, the governor is unable to sanc-To BE LAUNCHED .- Capt. T. H.
